

JAGADEESWARA RAO PEEDADA

ASPIRING AI ENGINEER | FULL-STACK DEVELOPER

Email: jagadeesvarrao@gmail.com Phone: +91 8790906267 Location: Visakhapatnam, AP, India

Web: my-portfolio-five-mu-77.vercel.app LinkedIn: linkedin.com/in/jagadeeswara-rao-peddada-652724270

SKILLS DIRECTORY

Core Skills: Large Language Models (LLMs) • RAG • Prompt Engineering • Python • System Architecture • Vector Databases • Google Gemini API • Flask • Streamlit • SQL (PostgreSQL • SQLite) • React.js • Next.js • TypeScript • JavaScript • HTML5/CSS3 • TailwindCSS • RESTful APIs • Git/GitHub • Pandas • Prisma ORM • SQLAlchemy

CODE REPOSITORIES & PROTOTYPES

JARVIS (Autonomous AI Desktop Assistant) (github.com/jagadeesvarrao-design/JARVIS) *Python, Gemini API*

Engineered an autonomous agent that takes verbal descriptions and generates, compiles, and tests full-stack Flask web applications. Implemented Traceback-Aware Self-Healing logic that allows the AI to intercept crash logs and fix its own code bugs on startup. Integrated real-time computer vision and semantic memory capabilities using ChromaDB for context retention.

PromptLabs (Prompt Engineering Workspace) (promptlabs-j8wm.vercel.app) *Next.js, TypeScript, Tailwind*

Designed and deployed a production-ready workspace bringing software engineering practices to LLM prompt creation. Developed Git-style version control for prompts, allowing users to track changes across staging and production with visual diffs. Built an automated A/B regression testing suite utilizing an 'LLM-as-a-judge' to grade response quality against custom rubrics.

QueryAI (Universal Text-to-SQL Analyst) (github.com/jagadeesvarrao-design/QueryAI-TextToSQL) *Python, Streamlit, SQLAlchemy*

Built a data analytics platform that translates natural English questions into optimized SQL queries for 5 major database dialects. Engineered an intelligent auto-visualization engine that inspects SQL result sets to dynamically render interactive Plotly graphs.

Intellidoc (AI PDF Assistant) (pdf-analizing-and-answering-bot-1.onrender.com) *Python, FastAPI, RAG*

Developed a custom Retrieval-Augmented Generation pipeline allowing users to upload and chat with massive PDF documents. Implemented precise image cropping that physically scans PDF coordinates to display a visual bounding-box snippet to prove answers.

EDUCATION & CREDENTIALS

B.Tech in Computer Science and Engineering *2022 - 2026*
Miracle Educational Society, **Grade: 7.7/10.0 CGPA**

Intermediate Education *2020 - 2022*
Visakha Defence Academy, **Grade: 650/1000 Marks**

Tenth Grade (SSC) *Passed: 2020*
Sri Swamy Vivekanadha High School, **Grade: 428/600 Marks**
